DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Iwahara et al (US Publication number 20030123853).

In regards to claim 1, Iwahara et al discloses a reproduction apparatus for reproducing data recorded on a recording medium (Fig. 2A), comprising: special reproduction means for executing special reproduction of reproducing the data at a different speed from a speed for normal reproduction (Fig. 22A and Paragraph [0031]); storage means for storing a reproduction position at start of the special reproduction (Fig. 2B, element 11C); and reproduction means for executing the normal reproduction from the reproduction position (Fig. 2A, element 10).

In regards to claim 2, Iwahara et al discloses a reproduction apparatus for reproducing data recorded on a recording medium (Fig. 2A), comprising: special reproduction means for executing special reproduction of reproducing the data at a different speed from a speed for normal reproduction (Fig. 22A and Paragraph [0031]);

storage means for storing a reproduction position at start of the special reproduction if the special reproduction is executed (Fig. 22A, start of fast forward ty1 and normal playback return ty2); input means (GUI) for indicating movement of a position of the data to the reproduction position after the special reproduction is started; and reproduction means for executing the normal reproduction from the reproduction position in response to an instruction of the input means (Paragraph [0221], the GUI only displayed only the normal parts and not the fast-forwarding parts (special)).

In regards to claim 3, Iwahara et al discloses the reproduction apparatus according to claim 1 or 2, wherein the storage means deletes the stored reproduction position when the special reproduction is executed subsequently (Fig. 23-24 and 6A; after it retrieve the array of the start and stop position, Fig. 6A updates the GUI).
